Professional Summary

Experienced and detail-oriented Front-End Developer with 3.3 years of expertise in building scalable, responsive web applications using Angular, JSP, JavaScript, HTML, and CSS. Experience in Trade Finance, contributing to solutions for major bank - **Indian Bank**. Additionally, worked on Eclipse BIRT (Business Intelligence and Reporting Tools) for designing dynamic reports and advices. Gained hands-on exposure in integrating RESTful APIs, managing application deployments using Oracle WebLogic Server. Recognized for delivering high-quality solutions, seamless implementation, and effective collaboration with cross-functional and client-facing teams.

Technical Skills

- **Frontend Development:** Angular, JSP, JavaScript, HTML, CSS, Redux Pattern
- **Backend & Database:** SQL Developer, Oracle DB, RESTful APIs
- **Reporting Tools:** Eclipse BIRT (Business Intelligence and Reporting Tools)
- **Application Server & Deployment:** Oracle WebLogic Server
- **Version Control:** Git, GitHub
- **Tools & Utilities:** EximBills Utility Tool (custom development for Trade Finance)
- **Soft Skills:** Team Leadership and Supervision, Problem Solving and Decision Making, Cross-Functional Team Coordination, Mentorship, and Strategic Planning.

Professional Experience

Tata Consultancy Services, Chennai

Front End Developer — Feb 2022 – Present

Client: Indian Bank Head Office (EximBills, Trade Finance)

- Developed and maintained trade finance applications (EximBills) to support banking operations related to inland/foreign trade, letters of credit, export/import bill processing, bank guarantees, and remittances.
- Designed and implemented responsive and interactive UI screens using Angular, JavaScript, HTML, and CSS for smooth user interaction and data input.
- Enhanced existing modules built in JSP by integrating Angular-based components, ensuring better performance and maintainability.
- Deployed and managed applications using Oracle WebLogic Server, ensuring stable delivery across development and UAT environments.
- Consumed and integrated RESTful APIs for seamless communication between frontend modules and backend services.
- Developed dynamic advice letters, bank reports, and dashboards using Eclipse BIRT (Business Intelligence and Reporting Tools), streamlining regulatory and customer communications.
- Created and optimized complex SQL queries using SQL Developer to support backend functionality and generate business-critical reports.
- Acted as a liaison between clients and the development team, translating business requirements into technical solutions.
- Provided production support and resolved critical bugs, ensuring uninterrupted operations in a time-sensitive banking environment.

- Contributed to code reviews, documentation, and unit testing, maintaining high standards of code quality and regulatory compliance.
- Collaborated closely with cross-functional teams including middleware, CBS, and infrastructure teams to ensure successful end-to-end delivery.

Projects

Exim Bills Enterprise & Customer Portal

Exim bills Enterprise and Customer Portal are Trade Finance applications designed for major bank - Indian Bank. These applications facilitate the processing of letters of credit, export/import bill processing, bank guarantees, and remittances. The system ensures seamless banking transactions and secure data processing.

- Engineered seamless integration between Eximbill Enterprise and Customer Portal to enhance transaction efficiency.
- Optimized SQL queries for better data retrieval performance.
- Deployed applications on WebLogic to ensure high availability.

Education

B-Tech in Mechanical Engineering

Vardhaman College of Engineering, Hyderabad, Telangana

Graduation Year: 2020
