SUMMARY

Automotive Software Professional with over 5 years of experience in developing and debugging, testing Automotive software. With a strong focus on HIL and Diagnostics testing, as well as a deep understanding of automotive compliance standards such as AUTOSAR and ISO 26262. Self-motivated with a proven ability to deliver tasks with minimal supervision and thrive in challenging environments.

EXPERIENCE

Senior Engineer

MAGNA AUTOMOTIVE INDIA

📅 01/2025 - Present 📍 Bengaluru

- Working as HIL Test Engineer for an eDrive Inverter ECU for Mercedes and BMW OEMs with compliance to AUTOSAR, ASPIICE and ISO 26262
- Verification and Validation of Automotive software components and Diagnostics using dSpace scalexio and Tracetronic ECU Test tool, python framework.

Visited Austria on a business travel for project requirements and collaborated directly with on-site counterparts to align system test objectives and implementation.

Senior Engineer

TATAELXSI LTD

📅 02/2021 - 12/2024 📍 Bengaluru

- Worked as Embedded Senior Software Engineer in Automotive team for the design, development, Verification and Validation of Automotive software.
- Verification and Validation of Automotive software using Vector CANoe, CAPL, Python, Trace32

EDUCATION

Bachelor of Technology

Vaagdevi Institute of Technology, Proddatur (JNTUA)

📅 08/2015 - /2018 📍 Andhra Pradesh

Diploma

Government Polytechnic, Kamalapuram

📅 07/2012 - 05/2015 📍 Andhra Pradesh

CERTIFICATION

ISTQB CTFL

ISTQB Certified Test Engineer

KEY ACHIEVEMENTS

Automotive Software Testing

- Created a python XML based test client-server and deployed to work as remote HIL bench.
- Received Customer appreciation for quick & quality deliveries.

LANGUAGES

English

Telugu

SKILLS

CAPL PYTHON C/C++ UDS(Diagnostics)

DSpace Control Desk ECU Test Tool

VectorCANoe Trace32 CodeBeamer

CAN Protocol GIT PTC Windchill

OpenGL Graphics Library using C

PROJECTS

HIL Test for eDrive Inverter ECU

- Conducted Hardware In Loop testing for eDrive inverter software components with Dspace Scalexio, Control Desk, and Python
- Responsible for functional testing of multiple software component and Diagnostics.

Bootloader Testing

- Performed qualification testing using Vector CANoe, CAPL scripts, UDS.
- CAPL script implementation for flashing application using UDS(Diagnostics).

ADAS ECU Testing (Parking Control)

- Performed software unit, Integration, and qualification testing for ADAS ECU using CANoe, CAPL, Trace32, Python
- Mentored trainee engineers and discussed project status with clients (VinFast).

Augmented Reality Camera (BMW - ARCAM Algorithm)

- Developed video pipeline rendering feature using OpenGL (Graphics library) using C++.
- Prepared SDD and test specification for unit testing of ARCAM Software.
